SECTION-A

Scope of work :-

Name and scope of hiring :- To provide on hire the following module of equipment to be deployed at FSNL Bhilai Unit, Inside Bhilai Steel Plant for collection, loading, transportation of plate cutting/ scrap from plate mill and unloading the same at SMS-II/designated area after weighment at BSP weighbridge with a lead distance of 5 Kms. one way. The job is to be done under the supervision of FSNL.

S/n.	Module of equipment	=	No. of Eqpts.
1.	Crawler Magnetic Crane (70 MT Capacity)	=	01 No.
2.	Tipper (16 MT Capacity)	=	02 Nos.

Hiring Hours of module of equipment as per above jobs :-

1. The total requirement of **working hour** of module is **2100 Hours**.
2. The **productivity** of module of equipment must be **28 MT/hour**.

The work involves :-

1. With the above module of equipment to carry out the job of collection, loading and transportation of plate cutting/ scrap by tippers from plate mill inside BSP with the help of EOT crane and tenderer has to load the same where there is no approach of EOT crane.
2. Loaded tippers are to be weighed at any of plant's/ road weighbridge of BSP.
3. The loaded tippers are to be unloaded at SMS-II or any other sites as per direction of site in-charge with a lead of 5 KM one way.
4. The work is to be executed in "G" shift on all working days excluding Sundays and Holidays i.e. 25 days in a month, if needed the work is also to be executed on Sundays and Holidays.
5. Tenderer have to provide necessary operation and maintenance staff to ensure smooth running of the module of equipment at his own cost.
6. During the handling slings, all tools and tackles etc. should be provided by the success tenderer. In the event of any odd/heavy scrap required to be handled, it would be his responsibility to have the necessary facility in order to remove the obstacles coming in the way of handling and delivery of the scrap.
7. The supply of module of equipment is inclusive of POL and other charges including maintenance so as to ensure proper running of the equipment during the working hours. Since the handling and delivery of scrap is solely dependent upon the availability of the equipment in good running condition, it will be his responsibility to arrange the required quantity of POL and to attend the breakdowns immediately after occurrence during the working hours in case of necessity and in order to maintain the rated output, tenderer will have to arrange for the supply of substitute equipment in place of the equipment under major breakdown.
8. Subject productivity base module of equipment is minimal. In case of any intermittent urgent requirement of job, additional equipment will be deployed by the successful tenderer without any extra charge for fulfilment of the demand of steel plant. Tenderer should deploy additional equipment or may intermittently from other module without hampering the activity upon prior permission of operation in-charge.
